For Immediate Release:

Simplex Truck Curtains Keep Trailers Cooler, Save on Equipment and Fuel Costs

AirBlock Refrigerated Truck Curtains from Simplex Isolation Systems maintain desired temperatures inside refrigerated and insulated trailers, even in the hottest weather. Experience less produce shrinkage, thawing of frozen foods and preserve the freshness of dairy products.

AirBlock Refrigerated Truck Curtains install easily and come with all necessary hardware, including side-mount brackets for roll-up doors, allowing you to easily remove curtains for fast loading of trucks or trailers. Simplex's patented mounting systems hold up under heavy use. Eliminate the loss of cold air during entry and exit and cut the run time on your refrigeration unit by as much as 50%, reducing fuel costs, equipment replacement and maintenance costs.

You can also mount a second set of curtains inside the trailer to create colder interior spaces. This will allow you to create frozen food areas in trailers, while providing for other portions of the trailer that can accommodate produce, meats and cheeses and dairy that only require varying degrees of refrigeration.

Simplex curtains are made from virgin vinyl compounds that are UV stabilized to prevent yellowing, cracking or curling.

Founded in 1979, Simplex Isolation Systems designs and manufactures truck curtains, strip doors, and other separation products, as well as custom cleanrooms that are modular and easily expandable, and a number of other products for use in process isolation and contamination control. Simplex products are distributed in the U.S and Canada through a nationwide dealer network. To learn more about the complete line of isolation systems and safety products and solutions from Simplex, call 1-800-854-7951, or visit the Simplex website at www.SimplexIsolationSystems.com.
