For Immediate Release:

SoundBlock from Simplex Reduces Sound by Up to 48 db

SoundBlock, a sound-reducing vinyl material from Simplex Isolation Systems, provides up to a 48 decibel drop in sound level. It is the perfect product for manufacturers, shops and other factories that need to contain noisy procedures and protect employees from harmful sound levels.

SoundBlock inserts consist of two layers of clear or colored vinyl, heat sealed around a ½" thick layer of special bubble insulation. The material comes in clear, smoke tint and orange vinyl colors. SoundBlock will fit in any number of frame configurations and custom mountings offered by Simplex.

SoundBlock is available in any size and is used in softwalls, strip doors, standard cleanroom doors, industrial curtains and bi-folding curtains. Custom applications are also available.

Simplex also manufactures a wide selection of modular frame systems and wall materials for use in safety barriers, welding screens, safety mesh screens and other products. Simplex vinyl materials come in various thicknesses and colors, as well as materials that protect against light from welding processes, laser operations, and other harmful light sources. Solid wall materials include rigid panels such as polycarbonate, ABS, and aluminum honeycomb.

Founded in 1979, Simplex Isolation Systems designs and manufactures a number of products for use in plant safety and process isolation, as well as custom cleanrooms that are modular and easily expandable. Simplex products are distributed in the U.S and Canada through a nationwide dealer network. To find out more about the SoundBlock, or to learn more about the complete line of isolation systems and safety products and solutions from Simplex, call 1-800-854-7951, or visit the Simplex website at www.SimplexIsolationSystems.com.
